ASKS CATTLE QUARANTINE BE REINDED

Dr. Kearne, state veterinarian of California, was in Carson yesterday having come to this city to discuss the quarantine against California cattle with Governor Oddie.

The quarantine proclamation was issued about a week ago by Governor Oddie and prohibits the shipment of cattle into this state from that section of California lying south of the Mount Diablo base line, and was issued as a result of a petition from a large number of the cattle owners of the State of Nevada, who claim that cattle in the restricted district are exposed to a number of diseases that usually prove fatal to cattle, and if these diseases are allowed to be brought into Nevada they would be a nuisance to one of Nevada's most profitable industries.

It is said the Miller and Lux people are exerting every effort to have the quarantine lifted, because they want to ship thousands of cattle through Nevada into Inyo county, California.

When seen yesterday afternoon on this subject, Governor Oddie stated that he would take no action toward raising the quarantine until he was satisfied that the Nevada cattle would not be exposed to the cattle diseases said to exist in the restricted district of California.

—Carson News.

We wonder if ungrateful California remembers the unjust quarantine it placed upon Nevada potatoes, that the California potato kings might corner the spud market. Let the ingrates of our sister state holler and holler loud, but never raise a quarantine that would result in disaster and ruin to our cattle industry, until the cattle of California infected with disease has been eradicated. It is music to hear a native son squeal.
